Internal Medicine Opportunity — Locum Position

Headwaters Health Care Centre | Orangeville, Ontario

Position:	General Internal Medicine — Locum
Organization:	Headwaters Health Care Centre
Location:	Orangeville, Ontario
Position type:	Locum
Application deadline:	Until filled

Opportunity

Headwaters Health Care Centre has locum opportunities available in Orangeville for General Internal Medicine. You would join a group of nine General Internal Medicine specialists supporting a catchment area of 100,000 at a 75-bed hospital.

Clinical Practice

In the current model, internists participate in the call rotation and provide Emergency Department consultations, admissions, and ward coverage. The role includes coverage of a Level 2, four-bed intensive care unit that manages approximately 40 ventilated patients each year.
Call is from home, with an expectation of being available at the hospital within 60 minutes of telephone contact. General internists also perform a wide range of bedside procedures and have the opportunity to work to their full scope of practice.

Programs and Regional Support

Headwaters has an onsite hospitalist program, nephrology services with dialysis, diabetic care, and an outpatient oncology program operated through a long-standing partnership with William Osler Health System.
The team maintains strong relationships with referral centres for intensive care, stroke, and cardiology. Headwaters does not have cardiologists or respirologists on staff, allowing general internists to practice across a broad scope.

Candidate Profile

The ideal candidate will support our goals of providing high-quality local internal medicine care, collaborating with internists and other hospital- and community-based colleagues, and maintaining a healthy work-life balance.

How to Apply

Interested candidates are invited to submit an expression of interest and a current curriculum vitae to:

Janelle Stalder
Medical Affairs Coordinator
