

Kawartha Lakes – Routine Watermain Flushing in CKL Drinking Water Systems (DWS)

Watermain flushing will begin in the **Lindsay, Bobcaygeon and Fenelon Falls** drinking water systems on September 14, 2026.

Flushing dates for all other systems have been finalized and will be completed as per the following schedule:

Pinewood DWS – September 15
Norland DWS – September 17
Western Trent/Palmina DWS – September 17
Southview Estates DWS – September 17
Manorview DWS – September 17
Woodfield DWS – September 17
Woodville DWS – September 21 to October 9
King's Bay DWS – September 22
Mariposa Estates DWS – September 22
Kinmount DWS – September 23
Birch Point DWS – September 23
Pleasant Point DWS – September 24
Manilla DWS – September 29
Sonya DWS – September 30
Victoria Place DWS – October 7
Omeme DWS – October 8
Janetville DWS – October 14
Canadiana Shores DWS – October 20

The flushing of watermains is necessary to remove sediment that gradually deposits in the pipes. There may be brief periods of time when your water becomes cloudy or discoloured; please note that this is not harmful. Simply let your cold water tap run until the water runs clear. Please check your drinking, cooking and laundry water before using.

In addition to temporary discolouration, pressure fluctuations during the flushing process may be experienced. These fluctuations will stop once flushing is completed.

For additional information, please contact us at (705) 324 - 9411.
