## RE: Project Notification – Cahill Drain – Town of LaSalle

Please be advised that the Town of LaSalle's Public Works Division will be undertaking the repair and improvement of the Cahill Drain. The project includes vegetation removal within the drain corridor, excavation of the drain bottom in select areas, installation of erosion protection measures, and culvert maintenance. These improvements are being undertaken to restore and maintain the long-term function of the Cahill Drain, improve drainage performance, and address areas of erosion and vegetation overgrowth.

The trail within Brunet Park is expected to remain open for the duration of the project. However, temporary disruptions or brief detours may be required from time to time to accommodate construction activities and ensure public safety.

**Construction is anticipated to begin in late November 2026. The project is expected to take approximately 4 to 6 weeks to complete, weather permitting.**

The Contractor for this project is Warkentin Fabricating Inc., represented by project manager Zeph Friesen (phone # 519-791-9322). Dillon Consulting Limited, the firm that prepared the Drainage Report, will provide project management and construction inspection services throughout the project, and is represented by Mr. Oliver Moir, P.Eng (phone # 519-354-7802).

**Should any concerns arise throughout the project, please contact the Town's Drainage Superintendent, Brian MacMillan, at (519-969-7770 x 1270) or bmacmillan@lasalle.ca**. For after-hours urgent issues call the Town's Public Works Department at 519-969-4143.

It is stressed that construction sites are inherently dangerous and may present a variety of safety hazards. All residents are urged to exercise caution in and around the work area, and ensure children remain at a safe distance from any construction activities or equipment.

While effort will be made to minimize inconveniences, residents may experience noise or notice construction activity near their homes.

The Town appreciates your cooperation as this work is completed to maintain and improve the functioning of the municipal drainage system. Should you have any questions regarding this notice, please contact the undersigned.

Brian MacMillan, C.E.T.
Drainage Superintendent
