Instructions for Nerve Conduction and Needle EMG Studies

1. Bath/wash arms and legs the day of studies and do NOT apply skin conditioners/lotions over any part of the body afterwards.
2. Wear loose clothing:
 - a. For arm studies, long sleeves should roll up easily or bring a t-shirt. Females should wear tank top or sports bra underneath clothing in the event needle EMG is required.
 - b. For leg studies, wear loose fitting pants that roll up above the knees easily or bring shorts.
3. There is no need to remove rings on fingers. You may be asked to remove wrist bands, watches etc... temporarily during the procedure.
