

Notice of Construction

Whitevale Master Drainage Plan Implementation Project
Whitevale Road – Whitevale Bridge to Golf Club Road
North Road – Whitevale Road to 70m north of Churchwin Street

City Infrastructure Department

September 25, 2026

Anticipated Start Date: October 2026

Anticipated Completion Date: December 2026

As part of the Whitevale Master Drainage Plan Implementation Project, the City of Pickering's contractor, Elirpa Construction & Materials Ltd. (Quotation No. Q2026-25), will be undertaking storm sewer replacement and road reconstruction on Whitevale Road from the Whitevale Bridge to Golf Club Road and on North Road from Whitevale Road to approximately 70m north of Churchwin Street. The scope of work includes full road reconstruction, installation of new storm sewers and catch basins, sidewalks, ditches, and restoration to all areas as required. The project also includes road resurfacing from Altona Road to Whitevale Bridge.

There will be intermittent road closures on the east side of the bridge as the work progresses during storm sewer installation, but access for local traffic and emergency vehicles from North Road or Altona Road will be maintained.

During construction, temporary interruptions to driveway access may occur to facilitate the work. Affected residents will receive advance notice and will be requested to remove vehicles from their driveways prior to the commencement of construction activities. Every reasonable effort will be made to minimize the duration of such disruptions and to restore driveway access by the end of each working day.

We appreciate your patience and cooperation as we complete this important infrastructure project. If you require further information regarding this project or anyone in your household has any specific accessibility needs, we ask that you please contact:

WHAT TO EXPECT DURING CONSTRUCTION

	Work Hours: Work will take place from 7 a.m. to 7 p.m., Monday to Friday, with work after hours and on Saturdays, only as required.
	Telephone and Internet Services: If you experience a communication loss of services (telephone or internet) due to construction, it is the Homeowners responsibility to contact their respective service provider to arrange for a temporary/permanent repair. While the contractor makes every effort to avoid damages, unfortunately, it does occur as they occasionally encounter unexpected shallow wires not in compliance to city standards.
	Road and Sidewalk Access: In order to complete the work in a safe manner, there will be road and sidewalk restrictions within the construction work zone. Access for emergency vehicles will be maintained at all times. Driveway Access: The contractor will notify you of any temporary restrictions affecting access to your driveway. If your property has two entrances, one entrance will be kept open at all times.
	Parking: Parking in the active work zone is not permitted as space is needed for construction equipment and materials. This project will affect on-street parking. If your parked vehicle affects construction work, it will be relocated with no charge to the owner (every effort is made to contact the resident first).
	Parking Violation Notice: In an effort to reduce ticketing due to construction, the City encourages communities with construction to be patient as neighbours may need to temporarily relocate vehicles. If you receive a parking violation notice during this construction work, do the following within 15 days of the notice date: 1) Contact persons listed on this Construction Notice and give them the parking violation number. 2) Dispute the parking violation notice online or in person following the process listed on the reverse side of the parking violation notice. You may use this construction notice to explain why the violation should be cancelled. Please note: violation notices will not be cancelled if vehicles are parked illegally (i.e. in front of a fire hydrant, no parking zones etc.).
	Garbage and Recycling: Please follow your normal routine. If required, the contractor will move items set out for collection to an appropriate location in order to be collected and will return blue boxes and green bins Please ensure that you label your bins with your address.
	Restoration: The construction work area will be restored with sod and/or asphalt where required. Interlocking bricks, flagstone on a granular base, or other similar features that are removed from public and private property during construction will be replaced. Lawn seeding and/or laying of sod will be done as needed during ideal growing seasons only. Residents are encouraged to water newly installed sod to ensure its survival.
	Important information for owners of sprinkler systems/heated driveways and private landscaping features. Property owners should remove items located within City property limits (boulevard) to avoid damage. This includes items such as landscaping (plants and pavers), decorative objects and sprinkler systems. If you have a sprinkler system or heated driveway, please contact persons listed on this Construction Notice prior to the start of construction.
