Good morning Richelle!

Thanks so much for the question. The consent will result in the severance of a farm property. The newly created lot will be restrictively zoned to prohibit any future residential development, and there is no intention for the land use to change from the current agricultural use for crop production on either the retained or severed parcel. For that reason, an archeological assessment was not a requirement for a complete application and therefore was not completed for the proposal.

Should you have any further questions, don't hesitate to be in touch.

Have a great day,

Good afternoon Elisha and Jani,

Could you please confirm if an archaeological assessment was completed for this lot? Since this application is for a severance to create a new agricultural lot, I want to ensure that an assessment was conducted.

Miigwetch
