French Immersion at Strathroy District Collegiate Institute

2027-2028

Grades 9-12

"Our Students, Our Future"

Program Description

Ours is a program created for non-francophone students who will study French language and culture through intensive practice in a variety of subject areas. The language of instruction is French not only for language and literature classes but for many other subjects as well. Students can choose to take French-language versions of Geography, History, Science, Math, Career Studies, Civics, Law, and Sociology/ Psychology / Anthropology.

All courses fulfil the same learning expectations as their English-language counterparts, with the added bonus of allowing students to earn their Immersion or Extended French certificates at the same time!

Certificates

- The Immersion French certificate requires a minimum of 10 courses, 4 of which must be in French language/literature
- The Extended French certificate requires a minimum of 7 courses, 4 of which must be in French language/literature

These certificates are an excellent addition to a student's professional portfolio. Upon completion of the elementary and high school programs, students typically will have gained close to 7000 hours of French Immersion instruction! The benefits of bilingualism are numerous:

- according to a national census, there are higher rates of employment among bilingual people in Canada
- having bilingual skills in a rapidly changing world makes employees much more flexible and more valuable to the workplace in their capacity to adapt to changes
- bilingualism is an added gift of enabling people to be more culturally aware and appreciative of the language and culture of others

FAQs (Frequently Asked Questions)

- Are there any excursions for Immersion students?

Yes! Immersion students have the opportunity to participate in subject-specific and other excursions as they become available: a fun way to put their skills into practice beyond the classroom.

- Do Immersion students meet other students, as well?

Yes! While Immersion students are, of course, in the same classes for Immersion subjects, they also have the opportunity to meet new friends in other courses, such as English, Physical Education, Computer Studies, Music, etc.

- Are there additional enrichment opportunities for Immersion students?

Yes! Grade 12 students interested in earning an internationally-recognized certificate of French proficiency are eligible to write a DELF exam. Our annual French holiday play is another way for students to get involved beyond the classroom.

- Is it recommended to take all of the Immersion courses offered?

Yes! Being in as many Immersion classes as possible not only increases certificate hours but can also further strengthen performance level on the DELF exam.
